Choosing your shoes is as significant as choosing the people to meet and places to go. Sometimes you give up comfort for formality and often choose to stay nearby because your shoes are uncomfortable. Finding the right shoes with both comfort and style seems quite difficult. walk&rest is the result of our pursuit of making “a well-balanced shoe” that satisfies both the style and comfort in urban life. We sought ways to incorporate the formality of shoes and the practicality of sneakers, while focusing on how to balance those two values, to come up with a new solution. As the saying goes, good shoes take you to good places, and walk&rest will definitely let you walk lightly to places that you want to go.
